FUND MANAGER'S REPORT

The Fund's performance for the month of December was 0.75% underperformed its benchmark by 0.13%.

The European debt crisis will continue to influence the MGS flows with choppy trading environment. Bank Negara Malaysia kept the OPR unchanged at 3.00% based on its assessment that the risks to growth and inflation are well balanced. However, we view that the risks are skewed to downside for growth given the uncertain and volatile external environment. There is possibility of BNM may cut its OPR by 25 to 50 bps in 2012 should the local economy be heavily impacted by the external environment.

We will continue to maintain our strategy to overweight AA-rated corporate bonds with focus on new issuances for better yield pick up. We will position to extend the portfolio duration and aim to be fully invested.
