FUND MANAGER'S REPORT

The Fund gained 3.64% in December, underperforming the benchmark by 0.95%. YTD, the Fund is down 0.19% versus the benchmark gain of 2.41%. Our underweight in big cap and index linked stocks contributed negatively to the performance of the fund.

We expect the start of 2012 to be a continuation of where 2011 left off, with caution and shifting in risk budgeting by institutions. We are not changing our strategy and maintaining asset allocation and risk for the portfolio

Bursa Malaysia is now the most expensive market in Asia, trading at a 35% premium to the region. However, rumblings of elections are in the air again. Although General elections are not due until mid-2013, but it will, in all likelihood, be called sometime in 2012. So although we continue to hold on to our defensive dividend growth stocks, we will add stocks that historically perform well during this 'election period'.
